I'm a fresh graduate with a focus on Web and Mobile Development. I'm experienced in Backend Development with Laravel and Node.js and have worked with Google Cloud Platform. I'm eager to contribute my skills in React, React Native, Backend Development, and Cloud Computing to innovative tech projects.

Experience

Fullstack Web Developer

June 2022 - December 2022

- Design and develop the front-end of a web application, using HTML, CSS, and JavaScript
- Develop the back-end of a web application, using PHP, Laravel, and MySQL

Cloud Computing Graduate at Bangkit Academy 2023

February 2023 - June 2023

- Deployed a machine learning model for road damage level prediction using Cloud Run.
- Implemented an API with Express.js on Cloud Run.
- Utilized Cloud Monitoring for efficient cloud monitoring, ensuring the optimal performance and availability of the deployed model and API.

Education

SMA Negeri 2 Tanjungpinang

2018

Sekolah Tinggi Teknologi Indonesia Tanjungpinang

2023

- Bachelor of Informatics Engineering
- GPA: 3.91

Projects

Academic Information System of Sekolah Tinggi Ilmu Ekonomi Pembangunan
